

DEMO 2B-2

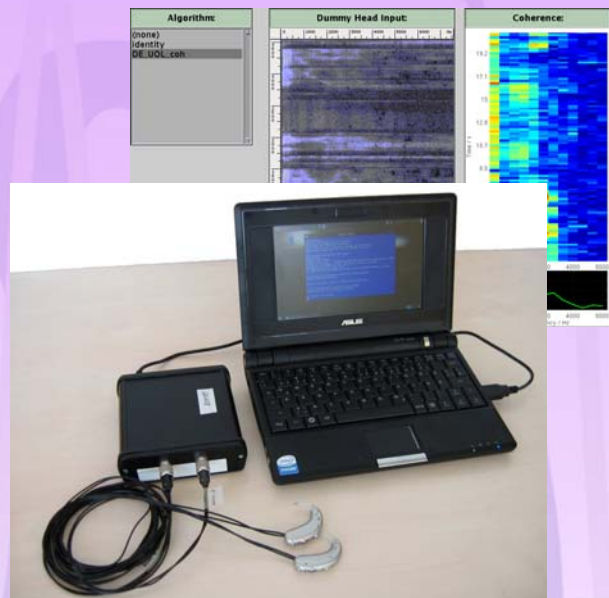

Personal Hearing System - A Portable Research Hearing Aid

Objectives

- Portable field test hearing aid for research and development
- Real-life evaluation of advanced algorithms
- Prototype for Communication Device with advanced hearing support

Description / Figures

- Portable: 1.2 kg, 17x20 cm
- Configurable
- Professional fitting interface for fitting to individual hearing loss
- Real time data inspection and data logging
- Connective: Interface to Personal communication system

Visions

- Further miniaturization
- Increasing performance
- Full integration into a Personal Communication System (e.g., SmartPhone)
